

Repose Range Overview

Reactive Pressure Redistribution

## Simple yet clinically effective

Healthcare professionals involved in the treatment and prevention of pressure ulcers are often faced with time constraints, limited resources and increasing budget pressures all of which can impact on patient outcomes.

Repose® is a range of static air, pressure redistribution and reduction support surfaces, all with high levels of immersion and envelopment. A combination of unique materials and Smart Valve Technology, has been clinically proven to deliver statistically significant patient benefits.<sup>1</sup>

Repose protects patients at all levels of risk

Unlike, other static air products and dynamic systems, through Randomized Control Trials, Repose reduces peak and average pressures and consistently delivers low levels of pressure ulcer incidence, in a cost effective, easy to use system.<sup>1-5</sup>

Repose is indicated for the prevention of pressure ulcers for patients at very high risk and treatment of all categories of pressure ulcer when used as part of a package of care.<sup>1-5</sup>

Repose is indicated for the treatment of all categories of pressure ulcers<sup>1-5</sup>

## Benefits of Repose

### Clinically effective

Repose has demonstrated low levels of pressure ulcer incidence across multiple studies (5.2%<sup>1</sup>, 4.8%<sup>2</sup>, 5.1%<sup>3</sup>, 5.2%<sup>4</sup>)

### Smart Valve Technology

Easy and reliable, Repose Smart Valve Technology ensures optimal inflation.

### Durable

If cared for correctly, Repose will provide pressure ulcer prevention for several years<sup>5</sup>.

### Support

Dedicated sales and clinical support ensure clinicians and patients are supported every step of the care pathway

### Comfortable

Repose is breathable and has no sharp edges, increasing comfort, compliance and prevents tissue damage.

### 2 year warranty

Repose is supplied with a 2 year warranty as standard
